

NOTE – the below yellow outline represents a completely unscientific approximate GUESS, drawn free-hand. Other documents on this website give exact coordinates. The purpose of this page is only to provide better indication of where the 499 Acres is IN RELATION to other parts of the county. Specifically, surrounding highways, freeways, and Lake Shastina (the 499 Acres is within a mile of Lake Shastina Resort).

Witney Creek (glacier melt from Mt. Shasta) flows onto the property in the lower SE section. On the 499 acres, Witney Creek goes underground, contributing mineral-rich water to the underground watertable.
